

Questioning skills: Developing teachers and pupils questioning skills to deepen and broaden thinking (and stretch both pupils and teachers)

*"The answers you get depend on the **questions** you ask ..."*

This practical and interactive workshop will explore how to use questioning more effectively in the classroom to create an inspiring learning environment and encourage deeper and broader thinking across the whole curriculum. We will work on both the questions you ask as a teacher to actively engage pupils in learning **and** how to get your pupils to ask more and better questions.

There will be opportunities to share good practice as well as explore new tools for questioning and practical ideas for the classroom. This will include strategies for effective questioning to stretch and challenge pupils and incorporating questioning into planning.

This training can be adapted and modified to suit the individual needs of the school/organisation. It could be delivered as either a one day, half day or series of twilight taster sessions but is most effective as a one day course (or over 2 half day sessions).

"Our teachers found yesterday's session very useful! There was a very good balance between the theory and the practical which, again, our teachers appreciated. Excellent training, thankyou - it is up to us now!"
