

Child development - understanding more about how children learn through a knowledge of their early development

Many teachers have only a limited knowledge of child development from their degree or PGCE. These sessions will delve deeper into the aspects of child development which are directly relevant to classroom teachers including aspects of emotional, social language and cognitive development. We will investigate how and why this is relevant and how it can develop our practice as classroom practitioners .

This training can be adapted and modified to suit the individual needs of the school/organisation. It could be delivered as either a one day, half day or series of twilight taster sessions but is most effective as a one day course (or over 2 half day sessions).
