

## Collective Leadership

Strong collective leadership is about clarity of purpose. The world of sport provides a perfect illustration of how teams work collectively towards a single goal. Using lessons, case studies and examples from elite level sport, the programme leads teachers and middle and senior leaders through a process of reflection, review and action planning to raise their game, both as individuals and as teams.

A whole day (or equivalent) bespoke training and development for primary and secondary phase middle and senior leadership teams; large secondary department or faculty teams.
